

## EXECUTIVE SUMMARY

Gorman-Rupp has taken the concept of the solids-handling pump to a higher level of performance. For installations where stringy solids are affecting uptime and maintenance costs, you need the Eradicator™, Gorman-Rupp's innovative Solids Management System currently available for Super T Series® pumps. The Eradicator is designed specifically for today's "new sewage," sanitary wipes, plastic bags, feathers, hair, sludge and all other types of debris.

## ERADICATOR™ – SOLIDS MANAGEMENT SYSTEM INCLUDES:

1. A patented, lightweight inspection cover for faster access to the impeller without affecting impeller to wear plate clearances.
2. An innovative back cover plate incorporating an obstruction free flow path. Combining four support posts into a two-point "webbed" plate design for increased durability, reduced clogging and increased efficiency over other self-cleaning offerings.
3. A patent-pending, aggressive self-cleaning wear plate including integral, laser cut notches and grooves in combination with a revolutionary "tooth" designed to constantly and effectively clear the eye of the impeller.

**ERADICATOR™**  
Solids Management System

THE NEW INSPECTION COVER  
ALLOWS FOR EASY IMPELLER  
ACCESS AND ROUTINE  
MAINTENANCE. THE DESIGN  
GREATLY REDUCES CLOGGING  
AND DOWN-TIME.

## SUPER T SERIES® MODELS

Standard Cast Iron	G-R Hard Iron
T3C60SC-B	T3C71SC-B
T4C60SC-B	T4C71SC-B
T6C60SC-B	T6C71SC-B
T8C60SC-B	T8C71SC-B
T10C60SC-B	T10C71SC-B

## RETROFIT KITS

	Standard Cast Iron	G-R Hard Iron
T3	48275-807	48275-806
T4	48275-802	48275-803
T6	48275-804	48275-805
T8	48275-808	48275-809
T10	48223-201	48223-202

## FEATURES & BENEFITS

- **Reduction in Nuisance Clogging**
  - The Eradicator Solids Management System greatly reduces the potential for clogging
- **Greater Efficiency**
  - Innovative back cover design allows for a more efficient flow path
  - Clogging of any degree severely impacts pump efficiency
- **Overall Life-Cycle Cost Savings**
  - Reduced maintenance costs
  - Lower energy costs
  - Increased Uptime
